Abstract (en)  
[origin: WO8705155A1] A microwave switch used to connect selectively at least one coaxial input lead with at least two output leads of which at least one is a coaxial lead, comprises at least one rectangular wave guide passage (8, 9) in the switch rotor (2). In the housing (1) of the switch are mounted wave guide parts (5) of equal sizes and interconnectable through the wave guide passage (8, 9) and connected via adaptor (3) with the input or output coaxial leads.
