Abstract (en)  
[origin: WO8806307A1] The assembly comprises a bracelet (1) made of special spring steel, adjustable individually to all wrists and comprises a circular hole (3) in its central flat portion (21). The bracelet is covered with a one-piece removable sleeve made of elastic fabric. A casing is nested in the hole (3), the sheet of the sleeve being interleaved between the casing and the bracelet, without damaging the sheet. A tension ring arranged in a side groove situated at the base of the casing cooperates with the lower surface of the flat portion (12) of the bracelet in order to provide for a removable fixing of the casing to the bracelet.
