Abstract (en)
[origin: EP0294587A1] Skylight frame (2) for connection of a building member covering a roof opening (1), the said frame preferably being composed of PU foam (7), optionally with a fixed insert, and being surrounded on at least three sides by a thin sheet-metal frame (5). The skylight frame has an approximately wedge-shaped projection (8) at its top end and metal portions (13, 14) foamed into place and plastic-coated for connection of roofing foils. <IMAGE>
