Abstract (en)

[origin: US4846426A] The invention relates to a hang-up and protective arrangement for an electrical appliance such as a vacuum cleaner or carpet cleaning apparatus having a guide wand. The guide wand is equipped with a handle having an end portion with an opening formed therein from which an electrical cable passes from the handle. A U-shaped bracket has respective legs which are pivotally connected to the end portion of the handle so as to straddle the cable. The bracket can pivot between a pivoted-out position whereat the bracket can be hanged on a wall-mounted hook and a pivoted-in position.
