Abstract (en)

[origin: EP0295091A2] A device 10 for securing a letter box 22 comprises a first member 12 for fixing to a door 18 adjacent the letter box opening and a second member 14 attached to the first member and being rotatable with respect thereto. The second member rotates from a first position in which the letter box 22 can be opened to a second position in which the second member 14, optionally provided with a flange 20, prevents the letter box 22 being opened.
