Abstract (en)

According to the invention, in order to install the reservoir partly in the open, a walled cavity (2) is constructed, buried to the greater part of its height, and the reservoir (1) is placed partly inside this cavity, with a degree of play and preferably vertically, and projects from the top of the walled cavity; and means are provided for positioning (3, 17) and for securing (14) the reservoir to the cavity, as well as sealing means (13). The invention is of particular application to installations using a propane reservoir and intended for domestic use. <IMAGE>
