Abstract (en)

A shelter (1) for vehicles of any given description, comprising a tarpaulin cover (9) supported by a set of frame sections (4) slidably mounted to parallel tracks (2) fixed to the ground (3) and consisting in two uprights (5) interconnected at their top ends by a gently arched cross member (6); hinged struts (8) are used to connect the uprights (5) of each frame section (4) with those of the next, along both tracks (2). The resultant folding structure traverses from an uncovered situation, in which the frame sections (4) are gathered together and stowed at one end of the tracks (2), to assume the sheltering position, with the frame sections (4) spread apart to stretch the tarpaulin cover (9) taut over the vehicle.
