Abstract (en)
[origin: US4864066A] A process for the preparation of alkanediols by hydrogenation of alkynediols of from 3 to 8 carbon atoms in which a solution of the alkynediol in an alcohol of from 1 to 8 carbon atoms, the mass fraction of alkynediol being more than 5%, of water at most 10%, and of alkanediol from 20% to 85%, is hydrogenated at temperatures of 110 DEG C. to 240 DEG C. and pressures greater than 10 bar, the pH being greater than 6.
