Abstract (en)
[origin: EP0295600A2] A conveyor device in a tube, especially a torpedo tube of a submarine, contains a fixed piston rod 21 with a piston 30 fastened to it and a displaceable cylinder 31. The cylinder is guided in a sliding rail 35 and on its other side has a sliding track 34 on which a slide 4 is displaceable. The slide 4 is driven, during a movement of the cylinder 31, by means of a cable pull 5 running over deflecting rollers 51, 52, in such a way that, during a cylinder stroke, the slide 4 additionally moves on the cylinder.
