Abstract (en)  
1. Chair with detachable elements, of the type comprising two sides (3), attached in a removable manner to a seat (2, 22) and to a back (1, 21), characterized in that the front part of the seat and the median part of the back are fixed to the sides by means of opposed lateral buttons (4) formed with an irregular profile and adapted, by means of a reciprocal orientation different from that in use, momentarily imparted to the elements concerned, to be inserted into "buttonholes" (5) with a corresponding profile and of then being retained therein through pivoting by lowering said elements to the position of use, while the rear part of the seat is united with the sides by the engagement, at the end of lowering, of two projecting lateral lugs (6) in mating supporting gussets (7).
