Abstract (en)

[origin: EP0296858A2] An interchangeable head for machines for applying electronics terminals, which are applied to multipole ribbon cables with flat conductors, includes a single monoblock (1) that comprises members for cutting (5), advancing (7,8) and step-by-step gripping (10) of the terminals (4). Such a monoblock (1) can be applied to conventional electronic presses and be replaced easily and rapidly by the use of ordinary fastening screws.
