Abstract (en)

[origin: US4924547A] The present invention concerns a packageable toilet utensil comprising one handhold with two hollow bodies articulated with respect to each other, one open holder-forming body intended to receive at least a part of at least the active head of the utensil and one cover-forming body that may be folded on the holder-forming body, the active head carrying stem being mounted pivotally about a pivoting pin of the holder-forming body so as to occupy an active position in the prolongation of the holding-forming body in which position the stem and the active head are locked by folding of the cover-forming body.
