Abstract (en)
1. Packageable toilet utensil, such for example as a tooth brush, of the type comprising an active head solid with a handle consisting of a stem which carries the head and of a handhold connected to the stem so that the assembly formed of the head and of the stem be retractable into the handhold, characterized in that the handhold (5) comprises two hollow bodies (7, 8) articulated with respect to each other, one body (7) forming an open holder intended to receive at least a part (2) of at least the head (1) and one body (8) forming a cover folding back on the holder-forming body (7), and in that the stem (4) is mounted in pivoting relationship about a pivoting pin (9) of the holder-forming body (7) in a plane perpendicular to the longitudinal median plane of this body (7) so that the assembly formed of the stem (4) and of the head (1) can occupy an active position in the prolongation of the holder-forming body (7) in which position the said assembly (1, 4) is locked by folding back the cover-forming body (8) and an inactive retracted position after folding back of the cover-forming body (8).
