Abstract (en)

The present invention relates to a method and a device for the induction under pressure of the fuel mixture into a first cylinder of an internal combustion engine, this engine comprising at least one other cylinder having a pump housing. <??>The device according to the invention is characterised in that it comprises a connecting pipe (15) between the housing (14) and the first cylinder (1) and in that there is an angular offset not equal to zero between the cycle of each of the cylinders. <IMAGE>
