Abstract (en)

[origin: EP0297013A1] - A foldable container consisting, when flat, of two sheets (1a, 1b) of material which may be different or otherwise, opposite each other, and of the same dimensions, with a polygonal outline, abutting in a leaktight manner over all the sides of the said polygonal outline, except for one, and, at right angles with at least one of the said abutting sides (2, 3, 4), the two sheets comprise two superposed curved groove lines (9, 10, 11), terminating at the ends, or in the vicinity of the ends, of the joining line of the sheets delimiting the said abutting side (2, 3, 4), erection of the box being effected by pushing the abutting side or sides (2, 3, 4) equipped with the said groove lines (9, 10, 11) in towards the centre of the container. -Application to the packaging in a container or receptacle for all products, foodstuffs or otherwise. <IMAGE>
