Abstract (en)
Article of footwear, constituted by two distinct elements (100, 200), a first, lower element (100) constituting the sole and preferably made of polyurethane, the upper face (102) of which is arched and which is integral with a toe-cap (107) at the front and with a stiffening (111) at the rear, both extending above the said upper face (102), and a second, upper element (200) constituting, by itself alone, a complete slipper comprising an upper (201) integral with a fine wearing sole (220) which is flexible to conform to the arching (103, 104) of the first element (100). Detachable means (117, 223) are provided to hold the two elements removably in assembled conditions in use when the second (200) is placed in position on the first (100), between the toe-cap (107) at the front and the stiffening (111) at the rear.
