Abstract (en)
A lighting apparatus for lighting a plurality of discharge tubes such as fluorescent lights or neon tubes, comprising a stabilizer having a plurality of output terminals, one end of each being connected to one end of one of the discharge tubes, a plurality of switching means connecting the other ends of the output terminals of the stabilizer to respective other ends of the discharge tubes individually, and control means for individually and sequentially switching said plurality of switching means, whereby a single stabilizer may be used to turn on a plurality of discharge tubes.
