Abstract (en)

[origin: EP0299598A2] A clean release laminate construction with a clean lifting edge or corner which facilitates removal of a face sheet (10) from the laminate. A release composition (14) is pattern printed onto a backing sheet (26) prior to lamination with a releasable adhesive (28) so that at least one portion (18) of the face sheet (10) remains free from the laminate construction for easy lifting and removal. The invention also includes a method for the manufacture of such a laminate construction and for the production of a plurality of clean release labels on a continuous web of material.
