Abstract (en)

[origin: EP0299837A1] 1. Suction device usable on at least one level (1) of a building, of the type comprising a suction tube (6) held in the hand and connected by a flexible tube (7) to a suction duct (8) connected itself to a centralized suction collector (2), characterized in that at least the suction duct (8) can be wound up preferably automatically on a movable winding device mounted on a vehicle (5) and driven by the displacement of the same, the suction duct (8) being separable from the said collector (2).
