Abstract (en)
[origin: EP0299872A1] It comprises a plug (6) and a socket (7) capable of being joined by locking means, the plug comprising an insulating body (8) provided with recesses (14) for receiving and retaining conductive strips (3) of the cable (1), a covering cap (9), at least the internal wall (10) of which is conductive surrounding the said body (8), recesses (16) being provided between the said cap (9) and the said body (8), for retaining the conductive sheets forming earth planes (4, 5) of the cable, the socket (7) comprising an insulating body capable of being engaged in the said plug and comprising contacts (20) capable of coming into contact with the conductive strips of the cable which are housed in the said plug, the said socket body comprising over at least a portion of its length a conductive sheath (21) capable of coming into contact with the internal wall (10) of the cap covering the plug body. <IMAGE>
