Abstract (en)  
[origin: EP0300084A2] In order to avoid the deterioration inside a shoe because of sweat, an improved deodorant and/or perfumed footwear is characterized by the fact that it is formed by a posterior body (6), incorporated inside the heel (2), consisting of a lower chamber (3) holding the perfuming liquid, with holes (4) at the back running along the top of the chamber, conveying the liquid to a further, upper chamber (5) containing an absorbent element impregnated with the aforementioned liquid.
