Abstract (en)
[origin: EP0300177A1] 1. End piece (1) for the guiding of slats (3) of slated blinds in the lateral guide rails (15), one end (5) being connectable securely to the slat (3) and having a projection (27) for engaging in a recess in the slat (3), and the other end of said end piece being constructed as a pin (13) insertable in the guide rail (15), characterised in that the end (5) which is connectable to the slat consists of a lower supporting portion (9) connected securely to the pin (13) and of an upper locking portion (11) held by a predetermined breaking region (29), said locking portion (11) being adapted to be inserted in the supporting portion (9), overcoming the resistance to breaking, and to be latchable in the latter portion.
