Abstract (en)
[origin: EP0300206A1] The training device for gymnastic exercises has a frame (1, 2), a padded board (11, 12), supported at least partially on said frame, and at least one training apparatus (4, 5) arranged in the head region of the padded board. In order that different exercises can be carried out using this training device without reconstruction or attachment of training apparatuses, the frame (1, 2) is to have a guide (8), extending in the direction of the padded board (11, 12), for the padded board (11, 12), which is longitudinally displaceable on said guide, and at least one further training apparatus (7) is to be arranged in the displacement region of the padded board. <IMAGE>
