Abstract (en)
[origin: EP0300248A1] A cleaning apparatus for paint spray gun assemblies (138, 140) includes a cleaning cabinet (12), a paint cleaning fluid flow-line system (40, 42) and a pneumatic system for circulation of the cleaning fluid through the flow-line system (40, 42); fluid outlets (61, 62) in the flow-line system eject cleaning fluid under pressure within the cabinet; paint spray guns are supported in the cabinet with paint passage interiors of the guns in direct fluid flow communication with fluid outlets (58, 73); typically there is a plurality of fluid outlets for cleaning a plurality of spray gun assemblies simultaneously, a time control in the pneumatic system interrupts the circulation of cleaning fluid with a predetermined period, usually less than 60 seconds.
