Abstract (en)
[origin: EP0300432A1] Sectional radiator, especially made from aluminium, having an upper collector strip (1) for the forward heating motion and a lower collector strip (2) for the return heating motion, and having radiator sections (3) arranged between the two collector strips (1, 2) and connected thereto by means of pipe lengths. In this arrangement, the pipe lengths (5) are retained displaceably in the bores (32) of the radiator sections (3) and/or in the collector strips (1, 2), and the two collector strips (1, 2) are connected to one another by means of tension rods (6) which are subjected to the action of springs (7). <IMAGE>
