Abstract (en)

[origin: EP0300577A1] A steam generating device comprises an electric steam boiler (12) with first electrical resistances (13), for water-heating for the generation of steam and a pipe (27) connecting the said boiler to steam inlet ports (28) for sending steam to the interior of a steam bath cabinet (11) installation. Said device is wholly contained within a generally box-shaped container (10) having base dimensions equal to the dimensions of the upper part of the said cabinet on top of which the said container is applied, so forming with the cabinet a single whole.
