Abstract (en)
[origin: EP0301215A2] Illuminated advertising device for outdoor use having surfaces which appear dark and light in daylight and whose lightness is reversed at night under the influence of artificial light which acts from the rear, is produced by printing on the outer/most plate (information plate) a lightly hiding background and subsequently a darkly hiding background on surfaces which appear light in daylight and printing a dark background with a screen on surfaces which appear dark in daylight.
