Abstract (en)

[origin: EP0301926A1] Compactor system, consisting of a container (4) fed via a delivery chute (5), of a removable wall with a cross section which decreases in size slightly from the bottom towards the opening, lining the wall of the container on the inside, and of a piston (9) whose rod (18) is provided with means (8) for moving it cyclically between a low position inside the container and a high position and for exerting a compacting pressure in the low position. The container (4) is of parallelepipedal prismatic shape, the removable wall consisting of as many plane flaps (11) as the container comprises faces. <IMAGE>
