Abstract (en)

[origin: EP0301972A1] The machine comprises a work plate (1) on which may be mounted a tooling plate (2). The active means (60-63) are independent and provided with electric motors (70-73). These motors are connected to levers (50-53) which are detachably integral with tie rods (30-33) connected to tools (21-24). These active means are disengagably mounted onto a ball screw (45) driven by a motor (90). The invention proposes an associated control method. <IMAGE>
