Abstract (en)

[origin: EP0302029A2] On a sectional base (11), possibly with low-voltage power supply (12, 14), at least a longitudinal ferromagnetic zone (11A) is provided for the cooperation with permanent magnets (26) borne by lamp holders (20, L) or other objects to ensure the retention thereof on the base and the current supply by means of resilient appendixes (22, 24).
