Abstract (en)

Lavatory seat (1) linked together by a hinge with a back board (3) which is leaned against a wall and predisposed to contain a neat pile of paper (4), hollow punched, lavatory seat sheets treated with various adhesive zones (9,10,11). The lavatory seat (1) has, anteriorly, a handle (2) for raising the seat with one or more adhesive pads (6) which come in contact with a corresponding adhesive zone (9) found on each lavatory seat sheet (4). The invention is predisposed in such a way that, upon using a single lavatory seat sheet (4) is withdrawn from the pile and positioned correctly on the lavatory seat (1) itself.
