Abstract (en)  
[origin: EP0303541A1] Installation for spraying a coating product, in particular a conductive water-soluble paint. <??>The installation comprises a colour-changing unit (11) connected by a distribution circuit (12) to a spraying device (13); an intermediate reservoir (41) capable of being disconnected from the colour-changing unit consists of a pipe section of the circuit (12), which section can be connected to a pressurised reservoir (44) of rinsing product in order to permit the pushing of the injected paint into the said intermediate reservoir. <??>Application to the painting of bodywork elements in the automotive industry. <IMAGE>
