Abstract (en)
[origin: US4943900A] Lighting fixture including a light-transmitting lighting tube in which a plurality of series-connected miniature light bulbs are disposed and whose ends are provided with current connections in the form of female connectors which have an interior, centrally located, electrically conductive plug-in contact, so as to contact, when the lighting fixture is mounted, male connectors disposed in a holding head and connected with an electrical lead, the fixture further including a profiled connecting member which has a cross section in the shape of a circle segment and which, in the mounted state of the lighting fixture, is arranged so as to be rotatable about the lighting tube. The holding heads (2a, 2b) can be inserted into the ends of the profiled connecting member (3) and can be connected in a form-locking manner with the profiled connecting member (3) by rotating the profiled connecting member (3) and/or the holding heads (2a, 2b).
