Abstract (en)

[origin: EP0303861A1] An electrically operated apparatus for the volumetrically metered and gauged dispensing of mineral oil products, in particular oils or petrol/oil mixtures, possesses at least one storage container (4') for a mineral oil product and a piston measuring pump (60) driven via pressure lines (31', 32') which can be hydraulically pressurised. This driving of the piston measuring pump is effected by means of an electrically operated hydraulic pump (1'), whose working medium is the mineral oil product from the storage container which is to be dispensed optionally with other mineral oil products. <IMAGE>
