Abstract (en)

The removable marking tape (1) comprises a resilient pigmented base layer (2) consisting of non-cured elastomeric materials, into which base layer a net or fabric type reinforcement layer (7) is at least partially embedded. Reflecting glass particles (3) are rolled into the top surface of the base layer (2), and further reflecting glass as well as anti-skid particles (6) are distributed onto a film (5) of acrylic emulsion applied to said top surface. An adhesive layer (10) based on a polyisobutylene-butyl solution is provided on the bottom surface of the base layer (2).
