Abstract (en)

[origin: EP0304514A1] By means of the grate, it is possible to raise substantially the capacity and the efficiency of combustion of the fire-box. According to the invention, the grate (18) is mounted freely pivotably in a horizontal plane in the fire-box, is provided with a handle (17) for turning it and interacts with means (21-22) for making it oscillate in a vertical plane during its pivoting. <IMAGE>
