Abstract (en)
[origin: US4706397A] Each picture frame cassette has a frame member with two crossing rectangular frames which surround a picture window. A back-plate is fitted at the rear of the frame member behind the picture window. The frame member and back-plate enclose a picture seating, the end regions of which are open at the rear for the fitting and engaging of photographs. The cassettes are secured together by tongues fitted in seatings in the back-plate and are engaged by projections with apertures in the seatings. Securing recesses and string are attached therein for hanging purposes.
