Abstract (en)  
[origin: EP0304822A1] The jet boat according to the invention has a combined box-shaped and triangular hull (2), the bottom side (21) of the substantially rectangular hull bottom (22) being provided with a substantially triangular raised portion (23) extending towards the stern. In the weighted state of the bows the waterline circumscribes a rectangle, while the waterline circumscribes a triangle when the boat is under way. The jet boat is suitable for use as an aquatic sports implement, for instance as a platform for line fishing
