Abstract (en)

[origin: EP0305258A1] The invention relates to prefabricated elements for building walls and wallings. According to the invention, the wall element consists essentially of the assembly of an element forming a base (3), on which a wall element (2) is placed and locked by means of its foot (6) introduced into a congruent cavity (4) of the base. The invention is used particularly for making noise-preventing walls, storage walls and retaining walls. <IMAGE>
