Abstract (en)

[origin: WO8807019A1] An equipment (1) for transferring bobbins (13) at a bobbin delivery station (8), permitting the continuous transfer of bobbins comprises a centrally controlled drive unit (2), moving between the delivery station and the doffing station (8, 9), and having a loading bridge (3) capable of swinging between the outlet (10) of the delivery station (8) and the inlet (11) of the doffing station (9).

Abstract (fr)

Un appareil de transfert (1) de bobines (13) d'une station d'alimentation (8) en bobines, permettant de transporter les bobines pendant un cycle de travail, comprend une unité d'entraînement (2) à commande centrale, mobile entre la station d'alimentation et la station de réception (8, 9), et ayant un pont de chargement (3) susceptible de basculer entre la sortie (10) de la station d'alimentation (8) et l'entrée (11) de la station de réception (9).
