Abstract (en)
[origin: EP0305576A1] A stirrer for an industrial mixing machine or stirring machine has impellers (100) which consist of at least two parts (10), (20) which are freely twistable relative to each other and relative to a drive shaft (0) and can be locked in any selected position. As a result, the stirrer can be ideally adapted to the current requirements. <IMAGE>
