Abstract (en)
[origin: EP0305872A1] A fine-lead propelling pencil or similar comprises a tubular basic element and a lead-adjusting device for withdrawing inserting or advancing the lead and an eraser at the rear end. To improve erasing, the operating device (9) for the lead-adjusting device (8) can be operated from the casing surface (5) of the basic element (1) and the eraser (21) can be inserted in, and withdrawn from, the basic element (1) by a longitudinally-sliding operating device (30).
