Abstract (en)

[origin: EP0306419A1] The invention relates to a reel constituted by two flanges 7A, 7B formed by at least a first disc made of corrugated cardboard, of external diameter D, onto which is applied a second disc made of corrugated cardboard, which is provided, over its entire periphery and up to a diameter d less than D which corresponds to the diameter of the half-hub 6, with notches thus forming an assembly of tabs 5 which, after folding by 90 DEG in relation to the plane of the disc, constitute the half-hub. It comprises a central hole 9 for the passage of the paying-out hub and a plurality of holes 8 for the passage of the bands or strips for tying up the packages. <IMAGE>
