Abstract (en)
[origin: EP0306701A2] In order to provide an insert for furniture drawers, which insert is to be inserted in such a drawer and is also to be removable again without changing the actual furniture drawer so that the furniture drawer continues to be usable in an unchanged manner, and which furthermore allows not only one but a large number of additional troughs, trays or hollows to be inserted one above the other in a furniture drawer without changing it, an insert for furniture drawers or the like is provided with at least one trough, tray or hollow which is displaceable in the longitudinal direction, the rear wall of the drawer having been recessed at least to the level of the underside of the displaceable trough, and with longitudinally extending guide rails (10, 21), which are inserted positively in the drawer (1-5), for the longitudinally displaceable trough (23), the fixed guide rail (10) of which guide rails rests directly or indirectly against the bottom (20) or the side walls (3 and 4) and/or against the inside walls of the front and rear walls (1 and 5) of the drawer. <IMAGE>
