Abstract (en)

[origin: EP0306770A1] Plug connection for pipelines, particularly plastic compressed air lines, consisting of a screw-in nozzle, with an external thread for holding a pipeline end which can be plugged in from one side and of a clamping ring, holding the pipeline end after insertion, as well of a supporting sleeve, which is held inside the pipeline end and has an annular stop for the pipeline end and a stop for the clamping ring, the supporting sleeve (3) having a circumferential surface shaped such that, when the pipeline end (2) is clamped in place, a radial force produced by the clamping ring (17) results in a positively locking connection between the supporting sleeve (3) and the pipeline end (2). <IMAGE>
