Abstract (en)

[origin: EP0307231A2] A display device comprises a display panel having electrodes with a plurality of terminals, a driver circuit having electrodes corresponding to the display panel electrodes, and anisotropic conductive film for electrically connecting the display panel electrodes with the driver circuit electrodes, the connecting part of each of the driver circuit electrodes to be connected with each of the display panel electrodes comprising a first connecting portion and a second connecting portion, the first connecting portion being narrower than the second connecting portion.
