Abstract (en)

[origin: EP0307331A2] This apparatus comprises a straightening device (2) whose front end is mounted on feet and whose rear end is associated with a lifting mechanism (10). The rear end of this straightening device is equipped with removable ramps (16) and with removable platforms (17) extending them. On the upper face of the straightening device is mounted, longitudinally displaceable between the platforms (17) and the front end, a carriage (27) intended to receive the front axle of the vehicle. <??>Application to the loading and unloading of a vehicle on a straightening device. <IMAGE>
