Abstract (en)

[origin: EP0307953A2] The invention relates to a two-part window frame, in particular for caravans, mobile homes or the like, the outer frame (1) of which is provided with a profiled rail (2) for receiving the upper edge of the window pane (3) or for the articulated connection of a hinge rail (4) arranged at the upper edge of the window pane (3). In order to design a two-part window frame of the above type in such a way that it can be used at the same time for supporting the edge of the blind on the window side, the receiving groove (5) is arranged in the upper part of the outer face (2a) of the profiled rail (2). <IMAGE>
