Abstract (en)

[origin: WO8807073A1] Process for the preparation of a superalkanized additive with an anti-wear effect for lubricating oils, said process consisting of the carbonation of a reactive mixture composed of at least one detergent, of a derivate of an alkaline or alkaline-earth metal, at least one azotized and/or oxygenized promoter and a boron derivate, in a diluent oil and a hydrocarbon solvent.

Abstract (fr)

Cette invention concerne un procédé de préparation d'un additif suralcanisé à effet anti-usure pour huiles lubrifiantes par carbonation d'un mélange réactionnel composé d'au moins un détergent, d'un dérivé d'un métal alcalin ou alcalinoterreux, d'au moins un promoteur azoté et/ou oxygéné et d'un dérivé du bore, dans une huile diluante et un solvant hydrocarboné.
