Abstract (en)  
[origin: EP0309972A1] Ridge sealing and aeration element (300) which is to be attached to a ridge board (2) underneath ridge tiles and, after mounting, describes a vaulting surface. The element (300) possesses raised supports (9) which are designed as fins (9) arranged at intervals and standing with their lateral faces transversely to the ridge direction. The fins (9) can be made from solid material or, in the form of turned-out hollow bodies, in one piece with the other material of the element (300). At least a part of the fins (9) projects outwardly over the lateral edge of the element. <IMAGE>
